DETAILED ACTION

Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-14, drawn to method of identifying virulence factors of a bacteria,
 classified in class 435, subclass 440.
 - II. Claims 15-42, drawn to composition comprising mutant whole bacteria, classified in class 424, subclass 248.1.
 - III. Claims 43-44, drawn to method of immunizing, classified in class 424, subclass 9.2.
- IV. Claims 45-53, drawn to method of diagnosis, classified in class 435, subclass 4.

 The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the mutant bacteria can be obtained by selection of naturally mutated microorganisms, without the manmade introduction of ≥1 mutation.

Inventions I and III are drawn to different methods utilizing different reagents, with different end results.

Application/Control Number: 09/759,287

Art Unit: 1645

Inventions I and IV are drawn to different methods utilizing different reagents, with different end results.

Inventions II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the mutant bacteria can be utilized in *in vitro* assays for determining/diagnosing infections by the wild type bacteria.

Inventions II and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the mutant bacteria can be utilized in *in vivo* for immunizing hosts against infection by the wild type bacteria.

Inventions III and IV are drawn to different methods utilizing different reagents, with different end results.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, and because while the searches may overlap, the searches are not coextensive, restriction for examination purposes as indicated is proper.

Application/Control Number: 09/759,287 Page 4

Art Unit: 1645

2. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

- 3. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
- 4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney P. Swartz, Ph.D., whose telephone number is (703) 308-4244. The examiner can normally be reached on Monday through Thursday from 5:30 AM to 4:00 PM EST.

If attempts to reach the Examiner by telephone are unsuccessful, the examiner's supervisor, Lynette F. Smith, can be reached on (703)308-3909. The facsimile telephone number for the Art Unit Group is (703)308-4242.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the group receptionist whose telephone number is (703)308-0196.
